These are two separate quick-find indexes to the Peterson Field Guide -

“Western Reptiles and Amphibians, 3rd edition.” 2003, by Robert C. Stebbins.

They are formatted to fit the field guide so you can cut them and glue them inside the book covers.

Page one is sorted by common name, page two by the Latin genus.

More information is available at <http://www.californiaherps.com/indexpages/stebbinsindex.html>.

The indexes have been checked for accuracy, but if you find a mistake or have a suggestion to improve them, please email me at the address listed on CaliforniaHerps.com.
